- 3:** Install Item 9, Rear Passenger Side Panel.
- Align wheel well edge of the panel with the feature on the vehicle; position the contour of the panel to the vehicle wall.
  - Install hardware (A), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.
  - **4:** Install Item 1, Sliding Door Panel.  
First remove OEM bottom panel. Note: Sliding door must be closed to install panel;
  - Insert panel into the sliding door sill cavity, align holes at the bottom panel to the one on the door and insert hardware (A) in all of the holes provided.
  - Install hardware (B, C) first in the holes provided in the middle part of the upper section of the panel into the **door ribs, do not over tighten**, then install hardware at the top and by the handle; make sure the panel does not interfere with the door seal.

## Ceiling Liner Installation

### 5: Install Item 4, Ceiling Panel.

- Align Ceiling panel with the light features on the ceiling of the vehicle, insert the front of the panel between the headliner and the roof.
- Align the holes at the center of the panel with the holes in the ceiling cross bows and install hardware (A) on each side; this will align the panel with the ceiling.
- Push the panel against the ceiling and install hardware (A), in the holes provided starting from the front working your way towards the rear.
