B, C

*Note: Fix the left side of the panel with tape to keep it in position, make sure the tab on that edge is pushed inside the door cavity. With the tape holding the panel in position, pull the right side out, like a door, while holding it in position, install hardware (B,C) on the tab.

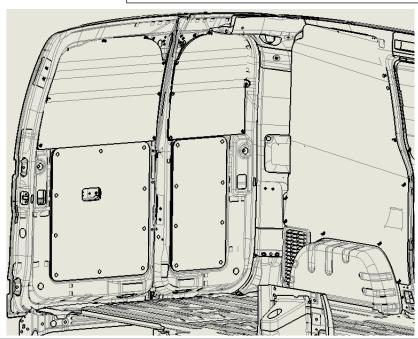

Α

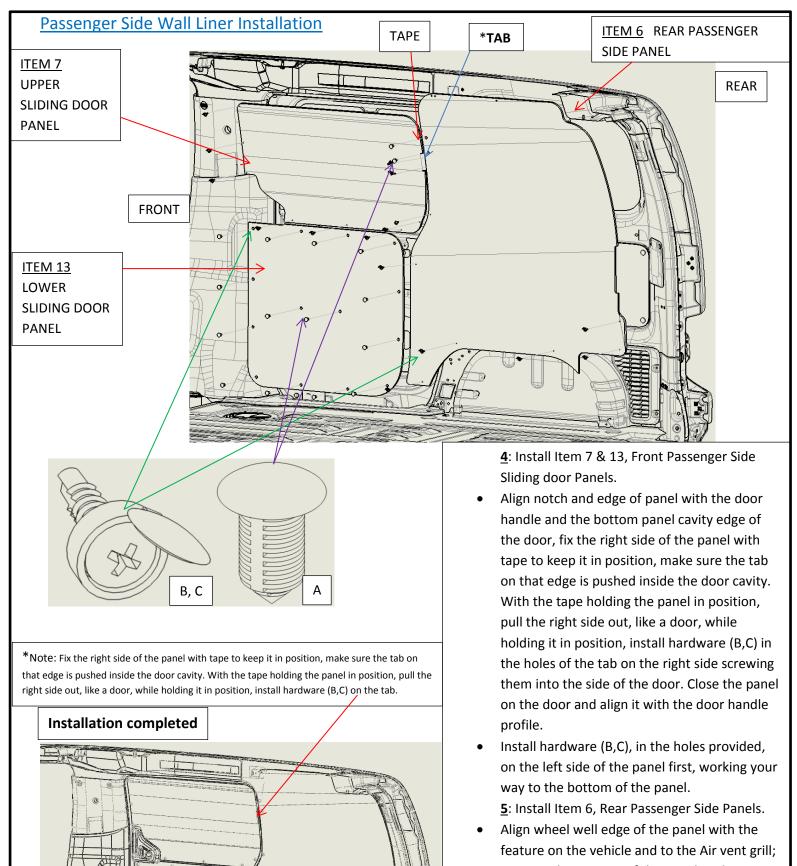

Installation completed

- Align notch and edge of panel with the door handle and the bottom panel cavity edge of the door, fix the left side of the panel with tape to keep it in position, make sure the tab on that edge is pushed inside the door cavity. With the tape holding the panel in position, pull the right side out, like a door, while holding it in position, install hardware (B,C) in the holes of the tab on the left side screwing them into the side of the door. Close the panel on the door and align it with the door handle profile.
- Install hardware (B,C), in the holes provided, on the right side of the panel first, working your way to the bottom of the panel.
 - <u>2</u>: Install Item 1, Rear Driver Side Panels.
- Align wheel well edge of the panel with the feature on the vehicle and to the Air vent grill; position the contour of the panel to the vehicle wall.
- Install hardware (A) and (B,C),, in the holes provided, on the bottom of the panel first, working your way up the panel to the top.
- DO NOT SCREW DOWN THE TOP OF THE PANEL, THE HOLES ARE FOR THE TOP SILL HARDWARE.

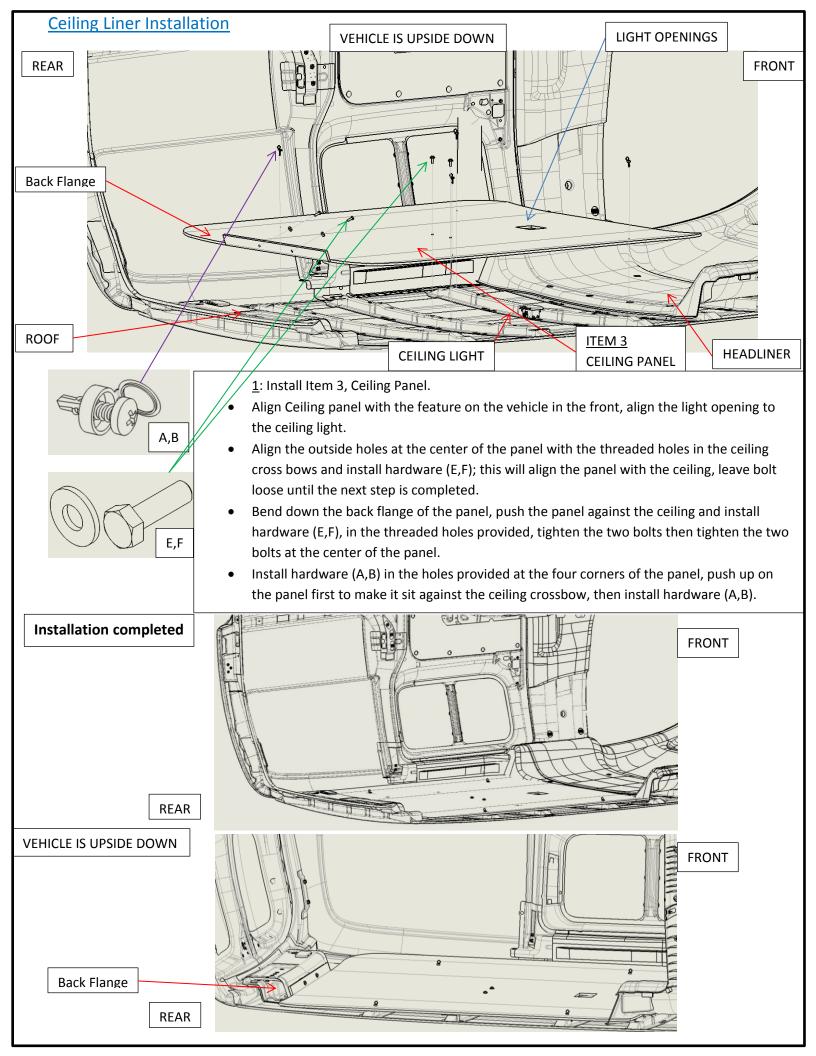

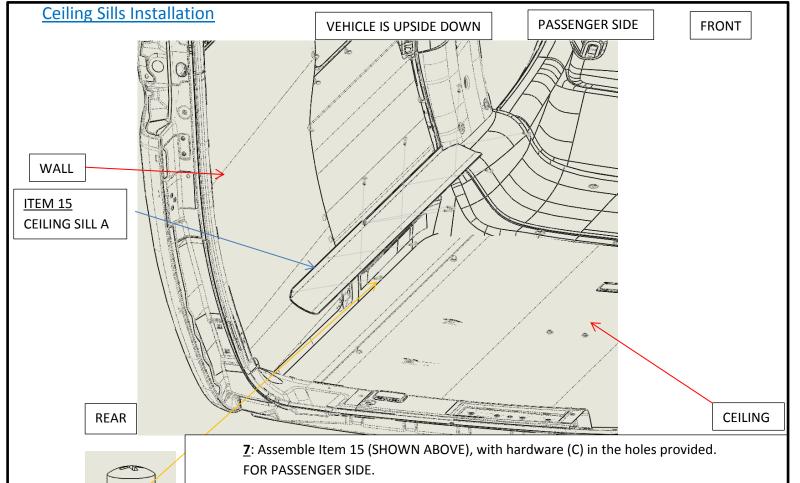

Installation completed

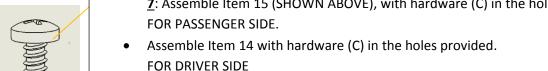

- feature on the vehicle and to the Air vent grill position the contour of the panel to the vehicle wall.
- Install hardware (A) and (B,C),, in the holes provided, on the bottom of the panel first, working your way up the panel to the top.
- DO NOT SCREW DOWN THE TOP OF THE PANEL, THE HOLES ARE FOR THE TOP SILL HARDWARE.

Install the Sill assemblies on the Driver side as well as on the Passenger side using hardware (C) in the holes provided on the Sills. Push up on the Sill when installing the screws on the ceiling panel.
